

SESSION 4: AIMS AND OBJECTIVES OF WaPUG

Presentation:-

9. Aims and Objectives of WaPUG
Dr. D. J. Balmforth, Sheffield City Polytechnic

Discussion:-

J. Packman

Is the first annual report to the Water Authorities Association Sewerage Rehabilitation Working Group available to WaPUG members?

A. Eadon

SRWG required only a very brief report. However, in future, annual reports will be circulated in the first mailshot of the following year.

B. Wilkinson

Can the WaPUG membership list be distributed to all members?

D. Balmforth

Copying and postage costs would be prohibitive since this is now a fairly long document. Any enquiries should be addressed to committee members.

D. Neale, Howard Humphries and Partners

How do members know who their nearest committee member is?

D. Balmforth

A list of committee members was circulated in a recent mailshot. If in doubt contact any committee member

G. Catterson

Suggested that Autumn meetings could be extended to 2 days since there is so much to cover and presentation times have had to be severely limited.

D. Balmforth

The intention has always been to reduce the amount of time people have to be away from work.

R. Ashley

Agreed that there is a need for occasional, more substantial meetings as WASSP experience increases.

D. Gordon, Strathclyde Regional Council

Can copies of previous mini-papers be obtained?

D. Balmforth

The papers were only distributed to organisations who were members at that time. Contact the committee for further copies

W. Gow

Briefly described his nomination to the WaPUG committee by SADWSS. Would prefer to remain part of a UK WaPUG but invited comment.

There was no support for a separate Scottish group.
