

Competency Framework for Wastewater Network Planners

The first edition of the new Competency Framework for Wastewater Network Planners is now on the WaPUG website. Please use it and let us know what you think of it. The guide is available for download from the website in .pdf format. We do not intend to produce a paper version.

The guide sets out the competencies that are expected of various roles involved in wastewater planning, with guidance on how these should be assessed. This allows individuals and managers to track progress and identify areas where further training and experience are required.

The vision is that the document will eventually provide guidance for an accredited programme of education, training and assessment leading to a recognised qualification accredited by some source outside WaPUG. In the meantime, it will provide a useful measure of competencies.

This more formalised system of education and training should lead to improved levels of skill and help improve the status of wastewater planners within the industry.

For the full details see www.wapug.org.uk. If you have any comments that will help us improve the next edition, please let us know.
